

Task 1: User Story reviewer

Steps:

- *Extract a User Story from Jira.
- *Pass the extracted User Story to your Langflow workflow.
- *review the usestories by giving the prompt to the LLM.
- *Copy the generated cURL command from Langflow.
- *Import or execute the same request in Postman.
- *Verify that the test cases generated through Postman match the output produced by Langflow.

User Story Evaluation Report

Introduction

The user story provided is related to the Retailer domain, specifically dealing with load testing for nomination/portfolio flow to handle a large number of entries. The story aims to ensure that the system can handle 150k entries efficiently.

Parameter Scores

- **Clarity: 16/20** The user story is generally easy to understand, but some parts of the description, such as the objective and the context, could be more clearly defined. The story lacks a clear and concise summary of the problem and the desired outcome.
- **Completeness: 12/20** The user story lacks well-defined acceptance criteria, which are essential for determining whether the story is complete and functional. The story also does not provide any

Generate

system constraints, but it may require some technical expertise and resources to ensure that the system can handle 150k entries efficiently. The story could be more explicit about the technical requirements and potential challenges.

Overall Quality Score: 75/100

Improvement Recommendations

- **Clarity:**
 - Provide a clear and concise summary of the problem and the desired outcome.
 - Define the context and the objective of the story more explicitly.
- **Completeness:**
 - Define well-structured acceptance criteria that include specific testing scenarios, test data, and expected results.
 - Provide preconditions and assumptions that need to be met before implementing the solution.
- **Business Value Alignment:**
 - Be more explicit about the business benefits and how the story aligns with retailer compliance and product safety.

curl --request POST \

```
--url 'http://localhost:7860/api/v1/run/b4d3d7cd-0cbf-4290-b844-ecb73e297111?stream=false' \
--header 'Content-Type: application/json' \
--header "x-api-key: YOUR_API_KEY_HERE" \
--data '{
  "output_type": "chat",
  "input_type": "chat",
  "tweaks": {
    "APIRequest-Jf9P2": {
      "body": [
        {
          "key": "jql",
          "value": "key=\"SCRUM-5\""
        },
        {
          "key": "fields",
          "value": "[\"key\", \"summary\", \"description\", \"status\", \"reporter\"]"
        }
      ]
    },
    "ChatInput-WXAggy": {
      "input_value": ""
    }
  },
  "session_id": "YOUR_SESSION_ID_HERE"
}'
```

Task 2: File Text Extraction

- * Read File (PDF or supported file format) and extract its text using Langflow.
- * Copy the generated cURL command from Langflow.
- * Execute the same request in Postman and verify that the extracted text matches the Langflow output.

upload file server curl:

```
curl.exe --request POST `
  --url "http://localhost:7860/api/v2/files" `
  --header "x-api-key: YOUR_API_KEY_HERE" \
  --form "file=@your_file_1.pdf"
```

Execute the flow with uploaded files

```
curl.exe -X POST "http://localhost:7860/api/v1/run/761fdbdf-f32c-4226-ac2b-
b4257d8215fd" -H "Content-Type: application/json" -H "x-api-key: YOUR_API_KEY_HERE" -d
'{
  "output_type": "chat",
  "input_type": "chat",
  "input_value": "Your message here",
  "session_id": "YOUR_SESSION_ID_HERE",
  "tweaks": {
    "File-le7gg": {
      "path": [
        "REPLACE_WITH_FILE_PATH_FROM_UPLOAD_1"
      ]
    }
  },
  "GroqModel-vOrLw": {
    "model_name": "meta-llama/llama-4-scout-17b-16e-instruct"
  },
}
```

```
"ChatInput-0x8bb": {
  "input_value": ""
}
}
```

Upload file server:

POST

http://localhost:7860/api/v2/files
